Advances in landscape-scale soil research

Edited by

D.J. Pennock and A. Veldkamp

Advances in landscape-scale soil research
D.J. Pennock and A. Veldkamp 1
Impact of a conversion from cropland to grassland on C and N storage and related soil properties: Analysis of a 60-year chronosequence
L. Breuer, J.A. Huisman, T. Keller and H.-G. Frede 6
Responses of a semi-arid landscape to human disturbance: A simulation study of the interaction between rock fragment cover, soil erosion and land use change
G. Govers, K. Van Oost and J. Poesen 19
Mapping hydrological pathways of phosphorus transfer in apparently homogeneous landscapes using a high-resolution DEM
M.P.W. Sonneveld, J.M. Schoorl and A. Veldkamp 32
Spatial patterns of land degradation and their impacts on the water balance of rainfed treecrops: A case study in South East Spain
B. van Wesemael, X. Rambaud, J. Poesen, M. Muligan, E. Cammeraat and A. Stevens 43
Soil–landscape modeling across a physiographic region: Topographic patterns and model transportability
J.A. Thompson, E.M. Pena-Yewtukhiw and J.H. Grove 57
Simulation of soil thickness evolution in a complex agricultural landscape at fine spatial and temporal scales
S. Follain, B. Minasny, A.B. McBratney and C. Walter 71
The geostatistical analysis of experiments at the landscape-scale
T.F.A. Bishop and R.M. Lark 87
Influence of soil pattern on matter transport in and from terrestrial biogeosystems—A new concept for landscape pedology
M. Sommer 107
Space–time Kalman filtering of soil redistribution
G.B.M. Heuvelink, J.M. Schoorl, A. Veldkamp and D.J. Pennock 124
Mechanistic soil–landscape modelling as an approach to developing pedogenetic classifications
B. Minasny and A.B. McBratney 138

Publisher's note iii

Research papers
Competitive adsorption and desorption of copper and zinc in acid soils
M. Arias, C. Pérez-Novo, E. López and B. Soto 151

Soil organic sulfur forms and dynamics in the Great Plains of North America as influenced by long-term cultivation and climate
J. Wang, D. Solomon, J. Lehmann, X. Zhang and W. Amelung 160
Mineral weathering in trachydacitic-derived soils and saprolites involving formation of embryonic halloysite and gibbsite at Mt. Amiata, Central Italy
G. Certini, M.J. Wilson, S.J. Hillier, A.R. Fraser and E. Delbos 173
Effect of soil–dung manure incubation on the solubility and retention of applied phosphate by a weathered tropical semi-arid soil
J.O. Agbenin and S.O. Igbokwe 191
Spectroscopic characterization of humic acid fractions isolated from soil using different extraction procedures
L. Timofeevna Shirshova, E.A. Ghabbour and G. Davies 204
Sorption of four triarylmethane dyes in a sandy soil determined by batch and column experiments
J. Mon, M. Flury and J.B. Harsh 217
Availability and uptake of phosphorus from organic manures in groundnut (*Arachis hypogea* L.)–corn (*Zea mays* L.) sequence using radio tracer technique
S. Mohanty, N.K. Paikaray and A.R. Rajan 225
Spatio-temporal variability of soil water tension in a tropical soil in Brazil
R. Cichota, A.L.B. Hurtado and Q. de Jong van Lier. 231
Adsorption of the pesticidal toxin from *Bacillus thuringiensis* subsp. *tenebrionis* on tropical soils and their particle-size fractions
P. Muchaonyerwa, T. Chevallier, O.L. Pantani, P. Nyamugafata, S. Mpepereki and C. Chenu 244
C and N stocks and the role of molecular recalcitrance and organomineral interaction in stabilizing soil organic matter in a subtropical Acrisol managed under no-tillage
C. Bayer, L. Martin-Neto, J. Mielniczuk, J. Dieckow and T.J.C. Amado 258
Changes in the rate of release of Ca and Mg and normative mineralogy due to weathering along a 5300-year chronosequence of boreal forest soils
M. Starr and A.-J. Lindroos 269
Sensing landscape level change in soil fertility following deforestation and conversion in the highlands of Madagascar using Vis-NIR spectroscopy
T.-G. Vågen, K.D. Shepherd and M.G. Walsh. 281
Location of natural trace elements in silty soils using particle-size fractionation
M. Hardy and S. Cornu 295
Small-scale spatial variation in soil CO_2 concentration in a natural carbon dioxide spring and some related plant responses
D. Vodnik, D. Kastelec, H. Pfanz, I. Maček and B. Turk 309
Colour space models for soil science
R.A. Viscarra Rossel, B. Minasny, P. Roudier and A.B. McBratney. 320
A reliable method for preserving soil structure in the field for subsequent morphological examinations
S.J. Mooney, A.R. Tams and P.M. Berry. 338
Sampling optimization based on secondary information and its utilization in soil carbon mapping
G.C. Simbahan and A. Dobermann 345
Spatio-temporal variability of some metal concentrations in the soil of eastern England, and implications for soil monitoring
R.M. Lark, P.H. Bellamy and B.G. Rawlins 363
Empirical modelling of soil dynamics along a chronosequence of shifting cultivation systems in southern Cameroon
M. Yemefack, D.G. Rossiter and V.G. Jetten 380
Investigating microbial micro-habitat structure using X-ray computed tomography
N. Nunan, K. Ritz, M. Rivers, D.S. Feeney and I.M. Young 398
Plant available potassium in New Zealand steep-land pasture soils
S.J. Officer, R.W. Tillman and A.S. Palmer 408
Estimating relative hydraulic conductivity from lognormally distributed particle-size data
S.I. Hwang and S.P. Hong 421
Changes in some physical properties of Mollisols induced by supplemental irrigation
M.A. Pilatti, S. Imhoff, P. Ghiberto and R.P. Marano. 431
Simplified denitrification models: Overview and properties
M. Heinen. 444

Application of a widely used denitrification model to Dutch data sets
M. Heinen 464

Short communication
The alternative meaning of pedoderm and its use for soil surface characterization
M.V. Fey, A.J. Mills and D.H. Yaalon 474

Book reviews 478
